

INFSCI 2710 \Database Management" Homework #4: Basic Queries in Algebra & SQL

Exercise 4

12 Points

Consider a database with information about classical music CDs. It consists of the following tables:

Composer(CNo, Last, First, Born, Died)

Piece(PNo, CNo, Title, Tune, Opus)

CD(CDNo, Name, Producer, Discs, Minutes)

Recording(CDNo, PNo, Orchestra, Conductor)

An SQL file will be made available at <http://www2.sis.pitt.edu/~sbrass/db/cd.sql> which contains the table declarations and some example data. After you downloaded it, you can execute it in SQL*Plus with the command \@cd" (if it is in the current directory) or e.g. \D:\cd" (if it is stored in D:\cd7(tains)-342(the)-342(t(.621 0 TdP.m,)-326(955 Tf -6
